

calyx by Claridge

Responsibly Harvested

ASH TREE

SUSTAINABILITY

Calyx by Claridge found a green solution to a natural problem—rescuing recoverable lumber through responsible harvesting and production.

More than merely a markerboard, MIX is a multi-purpose furniture line.

MIX customizable mobile and wall-mounted markerboards also serve as mobile space dividers, biophilic walls, and sound absorbing acoustic panels.

MIX offers design versatility in three distinct styles:

Industrial, Contemporary, and Biophilic. Nearly every component can be customized, including color, wood finish, writing surface, optional metal tray, metal base and accent strip. The result is a virtually unlimited palette with which to bring design concepts to life.

MIX even beats the beetles. Claridge is an *FSC® certified manufacturer that uses a proprietary harvesting and production process, where in-house craftsmen construct MIX's solid ash wood frames from portions of trees unaffected by the destructive emerald ash borer beetle. Calyx by Claridge uses landfill-destined ash lumber and integrates recoverable material into MIX's stylishly durable hardwood frame.

Make a statement and capture your thoughts on a beautiful surface worthy of attention.

Ash wood frame available in Clear, Vellum, Driftwood and Rustic stains

MIX BIOPHILIC PANELS

[VIEW ONLINE](#)

Biophilic panel can be applied to the MIX Contemporary or Industrial (shown above) mobile styles

Serenity

Om

Choose from two standard designs: Serenity and Om (shown above on Contemporary mobiles). Custom designs available upon request.

Our Biophilic panels are created using natural preserved plants. These long-lasting, maintenance-free gardens require no water, misting or irrigation, no light and no soil, but retain a vibrant, fresh cut look and feel for 7–10 years.

CHOOSE YOUR EXPRESSION

MIX INDUSTRIAL MOBILES

Choose the wood stain:
Clear, Vellum,
Driftwood or
Rustic

Metal base color
in matte clear
finish with
exposed hex bolts
