

Healthcare Communication *Solutions*

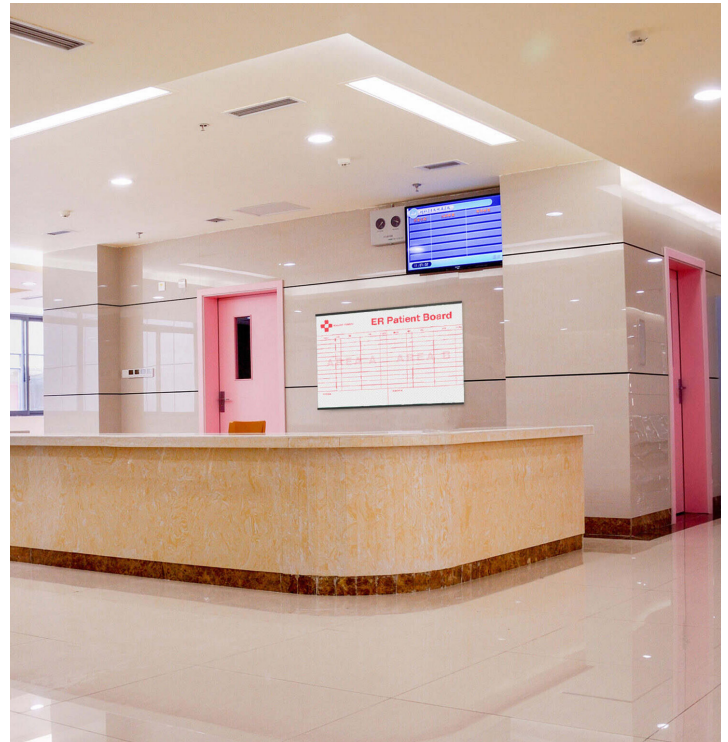

Patient-care involves more than the medical treatment they receive. Communication, privacy, and safety in the healthcare environment are just as important and Calyx healthcare offers products to maintain safety, reduce the risk of infection, positively impact HCAPS scores and support a system of care by enhancing communication with doctors, nurses, and medical staff. Medical privacy and sound absorption can be addressed with acoustic panels on space dividers or wall panels. For additional healing properties, biophilic panels create a soothing and appealing environment.

Calyx Healthcare

Safe, healthy environment for patient care

Backed by over 75 years of crafting the world's finest writing surfaces, Calyx by Claridge continues to deliver premiere visual communication tools sustainably made for a healthy environment.

- SCS Indoor Advantage certified on all products
